INJECT 55 Q

What is Diabexy??

Diabexy is an specializing in low glycemic load food products, aiming to educate and support diabetes management through its YouTube channel and Revertiz Diabetes Reversal clinic, envisioning a world free from diabetes.

Process Model

A process model is a structured approach that defines the sequence of steps and activities needed to design, develop, and maintain software systems.

Planning Estimating Scheduling Risk Analysis Modeling Analysis Design Construction Code Test Delivery, Support, Feedback

Which process model will we use??

The spiral process model is used in software development due to its iterative nature, allowing for continual refinement, risk management, and flexibility in accommodating changing requirements.

Reason of the selection

- Flexibility
- Low Risk Management
- Iterative Development
- Customer Feedback
- Strong Project Management

Why Spiral model is better than other model??

The Spiral model's iterative nature suits Diabexy's startup needs as it allows continuous refinement in developing diabetic-friendly food products, accommodating evolving requirements, ensuring better adaptability to changing market demands, and integrating feedback from their diabetes management clinic and educational platforms.
